Re Caught in the Act Video Surveillance systems

KSB Australia Pty Ltd installed a 10 camera system through Caught in the Act approximately 4 years ago.

We had been experiencing a rush of break-ins and vandalism due to the increase in copper scrap pricing.

As soon as the systems was installed we noticed a marked decrease in vandalism and the break-ins stopped .

Since the installation we have had a few issues , and the video evidence has been very beneficial .

We have also had the additional advantage of having footage of delivery traffic , and the occasional " near miss". This footage has been beneficial in allowing us to tailor some OH&S training and traffic flow studies .

I would recommend the installation of a Video Surveillance system as its benefits are more than just a security deterrent .
